

An in-depth study of the Dairy Value Chain in South Africa – OABS and Farm Vision

Strategic question: To what extent can the South African dairy value chain be optimised in terms of the utilisation and possible expansion its production and processing potential?

The objective of the in depth study was a consolidated report that quantifies the South African dairy value chain with the aim of fostering the optimal development of the dairy value chain towards promoting beneficiation and identifying employment, investment, export and skills development opportunities in the sector
