

**Feasibility study on milk production and processing in Gauteng and surrounding areas.
OABS and Farmvision**

The objective of this project was to undertake a comprehensive feasibility study on milk production (dairy farming) and processing in Gauteng in order to test the viability thereof i.e. to ascertain the technical, environmental, economic, financial and institutional feasibility of introducing a milk processing plant in the study area, and to compile a business plan including a proposed implementation plan that will assist with the implementation of the dairy production and processing project as well as develop a roadmap/implementation plan for its execution.
