EXPERIENCE

Koos Bouwer is an industrial/mechanical engineer specializing in the agricultural, agro-processing and manufacturing industries. He has 40 years' engineering experience with the last 15 years as a consulting engineer and project manager in a variety of business sectors, focusing on amongst others the following:

- Post-harvest and agro-processing facility design and implementation.
 - Master planning of agricultural, post-harvest and agro-processing developments and capital projects.
 - Feasibility studies and business plans for new ventures.
 - Business process analysis and optimization of operational processes.
 - Value chain optimization including proposed operational systems for planning, scheduling, resource balancing, production control, stock control and reporting.
 - Assisting clients to identify opportunities and to conceptualize solutions and plans for envisaged projects.
 - Technical due diligences of business plans and potential agribusiness transactions.
 - Resource efficiency improvement (energy, water, waste) and energy/water management systems.
 - Complex problem solving (material procurement, delivery times, quality problems)
-
